github.com/Zainali507595 | linkedin.com/in/zain-ali-dev69

## OBJECTIVE

Software Engineering student (BS, 2026) with a focus on AI/ML, interested in Software Engineering / AI internships. Builds websites and tools using AI-assisted development workflows, and has coursework/project experience with quantum-classical ML pipelines and cybersecurity tooling. Eager to grow hands-on coding skills in a real engineering environment.

## EDUCATION

**BS Software Engineering, Iqra University, Islamabad**

2022 – 2026

GPA: 3.0 / 4.0 | Coursework completed — degree conferral pending | Final Year Project: Quantum-Inspired Distracted Driving Behavior Detection

## TECHNICAL SKILLS

**Exposure to:** Python, C++, JavaScript, HTML5/CSS (through coursework and AI-assisted projects)

**AI-Assisted Development:** Building websites and applications with AI coding assistants — prompting, iterating, and debugging with LLM-driven workflows

**Tools & Platforms:** Git/GitHub, Linux, AWS, Streamlit, SQLite, Flask

**AI/ML:** PennyLane (Quantum ML), MobileNetV2, PCA, Ollama/Llama models, NLP

**Certifications:** AWS Certified Solutions Architect – Associate (2025–2028)

## PROJECTS

**Quantum-Inspired Distracted Driving Behavior Detection — Final Year Project** | *Python, MobileNetV2, PCA, PennyLane, Streamlit, SQLite*

- Built a hybrid quantum-classical pipeline combining fine-tuned MobileNetV2 feature extraction, PCA dimensionality reduction, and an 8-qubit variational quantum circuit to classify 10 driving-behavior classes.
- Delivered a Streamlit dashboard with SQLite logging for real-time behavior monitoring, plus a pytest suite covering statement coverage and equivalence partitioning.

**Python Web Vulnerability Scanner** | *Python, Flask, BFS Crawler*

- Developed a SQLi/XSS vulnerability scanner with a BFS-based crawler and a companion Flask test app, delivered with a full academic report for an Information Security course.

**AI NEXUS — AI Model Benchmarking Platform** | *Python, HTML, Ollama API, GitHub Pages*

- Built and deployed a full-stack site comparing frontier AI models, with a sortable benchmark table, scroll-reveal animations, and 3D hover interactions.

**AI Chatbot & AI Text Analyzer** | *Python, Ollama (Llama 3.2), HTML/JS*

- Built a local conversational AI assistant and a companion NLP text-analysis tool, both using Ollama for on-device inference with custom UI feedback components.

## EXPERIENCE

**IT Intern** — OGRA (Oil & Gas Regulatory Authority)

Jul 2024 – Sep 2024

- Supported IT operations and infrastructure tasks within a regulatory-authority environment.

**IT Intern** — Weekly Dunya Numa Newspaper

Jul 2024 – Sep 2024

- Assisted with IT operations and technical support for editorial/publishing systems.
- Completed a 2-day Media Training Workshop on Budget Reporting and Analysis (CPDI, supported by the National Endowment for Democracy), Jul 2024.

## EXTRACURRICULAR & VOLUNTEERING

- Volunteer, Pakistan Bureau of Statistics DATAFEST 2024 — coordinated event operations between participants and organizers.
- Self-directed builder of AI/ML side projects; active on GitHub.

## LANGUAGES

English (Fluent), Urdu (Fluent)
